

thefirebeamTM protectionsystemBLUE

THE FUTURE IN YOUR HANDS

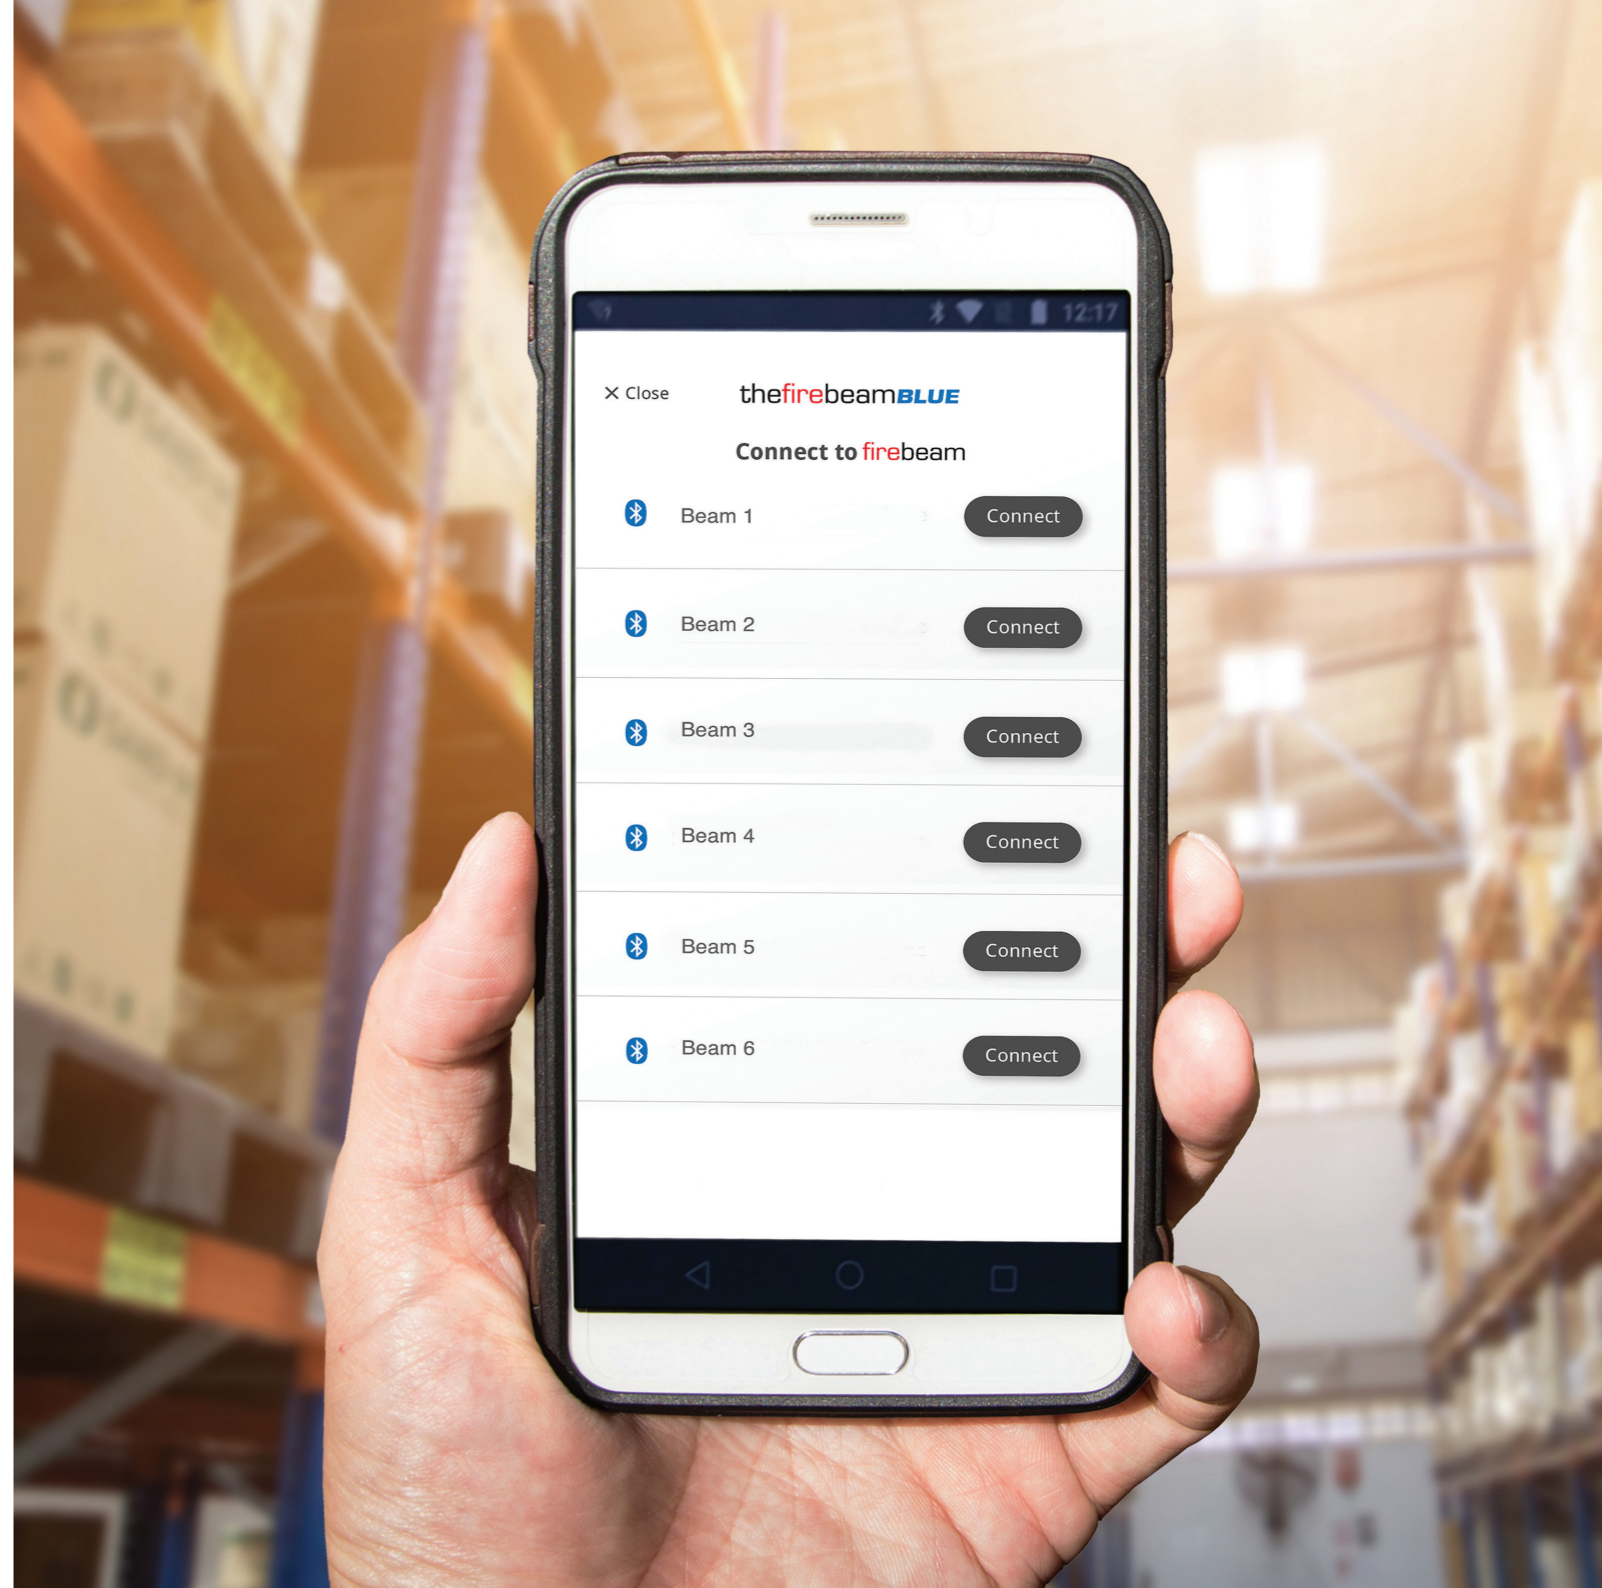

thefirebeamBLUE™

With this our latest self aligning
motorised beam
you no longer need a controller
for each beam head

Our **App** based beam will let you commission and
control **every firebeamBLUE**
in every building you ever visit with your
phone or tablet

The new firebeamBLUE

uses the **advanced** thefirebeam**Xtra** technology,
inherits the same reliability, benefits and an
unbeatable range of 160 metres
but is **commissioned and controlled**
using the **App**

Using thefirebeamBLUE

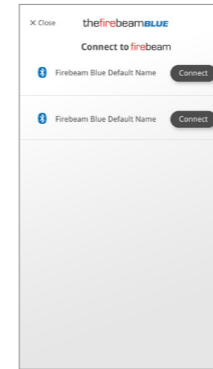

with a phone or tablet lets you do everything you
would with a controller

but is easier and more intuitive to use

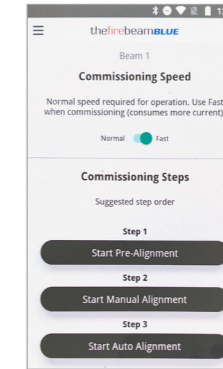

You connect to each beam using

Bluetooth  technology

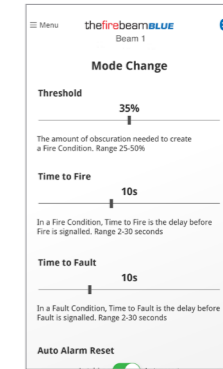

meaning you don't even need a phone signal or
internet connection

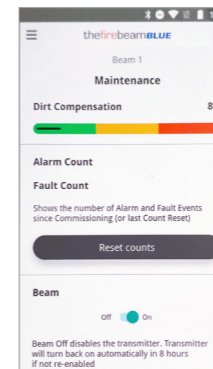

Connect to
Your chosen
beam

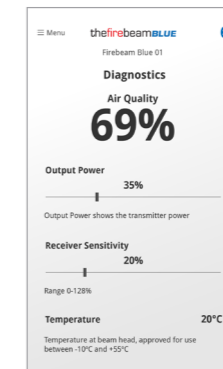

Commission
your beam

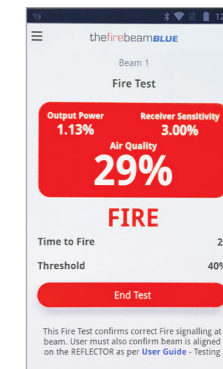

Change the
beams modes

Maintain your
beam

Adjust and
diagnose your
beam

Perform a fire
test

Imagine
fitting twenty
motorised
beams into a
building and
not having to
fit controllers
and run cables
to them

Dave spent a week
wiring in 20 controllers and has just been shown
the **firebeam** **BLUE**
Dave's not happy

Don't be like Dave
