

Video. Made Simple.

Introduction.

Network Optix is a software development company focused on creating cutting edge video management solutions. Our core product - Nx VMS - is an open, lightweight, customizable video management platform capable of managing offline media, live video streams, and integrated 3rd party systems and devices.

Nx VMS is a free live-streaming platform - cloud enabled, remotely accessible, scalable to any size, and licensed only when recording and search of IP Video cameras is required. Nx VMS is also open for developers, with comprehensive API and SDK documentation built-in and free to use, allowing organizations or individuals to create their own video-driven applications for any vertical market or project.

- Fully open VMS
- Universal Fish-eye dewarping
- Complete flexible lay-out
- Easy to program / Easy to use
- Lifetime license
- Cloud managed admin tool
- Apple, Windows & Linux

You choose your devices.

Nx Witness has applications for all major operating systems so our users are not limited by what device or operating system they choose to use on their desktops, mobile devices, rack mount servers, or even low-powered embedded devices.

Lobeco

FIRE + SECURITY

We make it work.

Dewarping.

One of the unique functionalities in Nx Witness is fisheye-dewarping. This function allow users to record only 1 stream of a fisheye camera instead of 2 streams or more. Because of the software dewarping users are able to dewarp the fisheye image at all times.

NxWitness dewarping works with every brand fisheye camera!

No need for special plug-ins or licenses. They just implement their favourite fisheye in Nx Witness, configure it and get all the benefits from Nx Witness dewarping!

Overview.
