Upgrade your system to the Next level!

NX-596E

The NX-596E is a dual-path IP High Security Grade III communicator with 3G cellular backup for the NetworkX security system family, supported by UltraSync. The NX-596E feature set offers solutions for IP alarm reporting as well as for the end-user who wants to control his security system with a push notification.

In addition, the UltraSync+ mobile app for Apple iPhone/iPad and Google Android smart phones allows users to arm/disarm, bypass zones, view event history, manage users, edit partition and zone names, send email reports and request the panel arm status based on geolocalisation.

The setup only requires to enter the NX-596E unique serial number and access code in the app. The NX-596E supports adding selected UltraSync ZeroWire IP cameras which have multi-layered credentials (username, password, web access passcode).

- Dual Path Interface (3G/Ethernet)
- 3G cellular as primary or backup path
- CMS alarm reporting to OH-NetRec or UltraSync
- UltraSync+ App for remote access and control
- Encrypted communications
- Up to 8 smart-phones / tablets
- Configuration via built-in webserver, App or DL900
- Video integration 16x UltraSync camera's
- Automation via scenes
- EN50136-2/EN50131-10 SP3/INCERT T014 compliant
- Geofencing inside/outside
- Compatible with NetworkX control panels as of version V2 (NX-4, NX-6, NX-8, NX-8E, NX-7, NX-9, NX-10 and NX-11).

Models:

- NX-596E-SIM: Dual Path Communicator with VPN and EU smart roaming Simcard Part. 01311
- NX-596E: Dual Path Communicator without Simcard Part. 01312
