AVIGILON™

AI NVR 2 VALUE

AI-enabled, enterprise-hardened recorder

Modernize your video security infrastructure with the cloud-ready Artificial Intelligence Network Video Recorder 2 Value (AI NVR 2 Value). Tailor-made for small-to-medium-sized enterprise sites with up to 50 cameras per NVR, the AI NVR 2 Value allows you to store twice the amount of data up to 24 TB.

Protect your critical assets using Avigilon's AdaptAI[1] server-side analytics, which is deployable with any third-party cameras. Locate people or vehicles of interest with Avigilon Appearance Search, Facial Recognition and detect brandished firearms using Visible Firearm Detection[2].

ADAPTAI ANALYTICS FOR NON-ANALYTIC CAMERAS
The first of its kind to bring Object Detection, Appearance Search, Facial Recognition and License Plate Recognition to your existing non-analytic cameras.

EASY UPGRADES
Remotely upgrade the AI NVR 2 Value, cameras and clients with a single signed and encrypted firmware package.

FIREARM-IN-HAND DETECTION
Help detect brandished firearms, including handguns and long guns, with Visible Firearm Detection.

LOWER OPERATIONAL COSTS
Achieve lower deployment costs with a single device that can perform as an NVR and an analytics-enabled appliance.

AVIGILON 3-YEAR WARRANTY
We back our AI NVRs with a three-year warranty, Next Business Day onsite support and 24/7 lifetime phone support.

NO RIP-AND-REPLACE
The AI NVR upgrades your entire site with the latest Avigilon analytics in a single click. No rip-and-replace of existing cameras is required.
