

Camect Overview

[Click here for our video introduction](#)

Camect is a Silicon Valley company creating the simplest and most useful security solutions from ordinary camera installations in homes and businesses. At Camect, ex-Googlers, computer scientists, and security industry veterans work together to redefine the security camera experience.

Camect's best-in-class AI understands objects that cameras see and raises alerts for only the interesting events – completely eliminating false alerts from bugs, animals, leaves, rain, shadows, etc.

Affordable

Private

Smart

Advanced Camect AI

- 🛡️ Eliminate false alarms from bugs, rain and shadows
- 👤 Over 30 classifications from a human/car to a delivery person and bear!
- 🧠 3 advanced neural AI engines for accurate results – the only vendor to adapt this technique
- ⚙️ No calibration and easy setup in just a few minutes

Open Platform including Onvif

- 📺 Onvif device ready
- 📺 Direct camera integrations with auto setup of leading brands
- 📺 Proprietary Nest and Arlo integration (No subscription from vendor required)
- 📺 Auto search and camera connection

Secure and intuitive user interface

- 🛡️ Integrated secure local and remote access – no need for a VPN
- 📺 Camera system protected automatically, recording and AI are local
- 🛡️ Security updates included
- 📺 Search for events in seconds and review a whole day in less than a minute with time-lapse reply
- 📺 Integrations with Sentinel, Google, Alexa, Google Drive and Dropbox cloud storage
